Daniel Ellsberg has been on the forefront of debate about American foreign policy for twenty years. He helped change the course of American history by releasing a seven thousand page classified document known as the Pentagon Papers in 1969. The content of these reports made clear that the government had consistently lied to the American public about its role in the Vietnam War. Ellsberg, a former Marine and high level consultant to Departments of State and Defense and to the White House, was indicted on twenty felony counts and faced a possible sentence of 115 years in prison. His case was thrown out in 1973 by the judge citing an extensive pattern of governmental misconduct in relation to the defense. Since then, Ellsberg has been an important voice in America's peace movement. Now 59, he has been honored with many awards, published numerous articles and academic papers and has been arrested some fifteen times in acts of civil disobedience. Today while many in this country express triumphalism about the Gulf war, Daniel Ellsberg has consistently spoken out and acted for dramatic changes in U.S. foreign policy and on behalf of nonviolence.
